

CERT-In and The Sycuris Lab Foundation are Jointly organising an online training program on "Understanding MITRE D3FEND Framework" as part of National Cyber Security Awareness Month October 2021 (NCSAM October 2021) during 18 - 24th October 2021 from 2-5 PM (3 hrs) each day.

Present Jointly World's First  
**MITRE D3FEND Training for Technology & Security Leaders**

DATE | 18-24 OCTOBER | TIME: 2-5 PM (3 hrs) each day

**Understand MITRE D3FEND Framework Brought to you by Sycuris Lab Foundation and CERT-In**

After MITRE ATT&CK, the Cyber Defense community required another intelligent support system with granular levels of countermeasures to decipher & prevent attacks.

Sycuris Lab Foundation (SLF) and CERT-In welcome you to MITRE D3FEND – the framework which essentially help create interwoven relation between ATT&CK and possible Countermeasures.

CERT-In is the National Nodal Agency for coordination of cyber incident response

activities as well as issue guidelines, advisories, vulnerability notes relating to Information security practices, proedures, prevention and response (<https://www.cert-in.org.in>).

SLF has studied the D3FEND framework along with 500+ countermeasure patents and designed a simplified D3FEND Training.

The Training aims at reducing IT risk and possible countermeasures using out of box solutioning for potentially preventing a complex cyber attack.

**To join Our MITRE D3FEND Training Program**, the candidate must have reasonable experience in Techonology & Cyber Security preferably with the roles of CISO/ CTO/ CIO/ Head-IT / Head-Networking/Security Architect / Academia/Professors/Lecturers.

latest by 13th October 2021

**MITRE D3FEND Training is delivered as follows:**

**Agenda**

01	02	03	04
Why D3FEND?	Coventants of D3FEND	Dissecting CounterMeasures	Certificate of Participation

Reach us by email: [mentor@sycurislab.org](mailto:mentor@sycurislab.org) OR [training@cert-in.org.in](mailto:training@cert-in.org.in)

**What would you learn:**

**HARDEN**

- Application Hardening
- Credentials Hardening
- Platform Hardening

**DETECT**

- Identifier Analysis
- Message Analysis
- Network Traffic Analysis
- Platform Monitoring
- Process Analysis
- User Behaviour Analysis

**ISOLATE**

- Execution Isolation
- Network Isolation

**DECEIVE**

- Decoy Environment

**EVICT**

- Credential Eviction
- Process Eviction
